Why Choose Us?

FORTUNA FAVET PARATUM

How prepared are you really?

Attention to Detail

It's our attention to the small stuff, scheduling of timelines and keen project management that makes us stand out from the rest. We are innovative, while keeping a close eye on the calendar and your budget.

Blueprint for Success

You want results and the best way is with up first understanding your organisation and its people. Only after we fully understand you and your business, do we begin proposing recommendations to managing your organisation's resilience.

Innovative

Yes, we have won awards and received many accolades for our work. But we first needed to understand the operations, strategic goals, and challenges of our clients, before we could outline a detailed roadmap for the way forward. To this end always consider our engagements a partnership to develop win-win outcomes, not merely supplying you a product or service.

Independent & Qualified

We are proudly independent and not motivated by KPI's or sales commissions. We are however unbiased, with the ability to pivot and adapt very quickly to your needs. Solutions should never drive an organisation, so every solution we deliver is tailored to our clients' needs.

Advisory & Consulting

We face a complex and ever-changing environment which requires ongoing change and transformation.

Our advisory and consulting services focus on your priorities and strategic objectives to help you transform your business. From organisational deep-dives, identifying context, through to evaluating and recalibrating global trends into robust action plans to successfully navigate complex pressures.

99 Risks Pty Ltd has the service offerings focused on design, management and execution for lasting change throughout your business life cycle.

Transformation & Change

Every organisation undergoes change, and yet a large proportion do not have an appropriate change management strategy. Change management should create the frameworks by which change is managed, providing assurance at the C-Suite of business as usual through the transition.

Change management sets the foundation for trust and transparency and increases the probability of a smooth transition to the new normal. The primary objective of change management is to ensure that the delivery of change objectives does not interrupt ongoing operations while the organisation is propelled forward.

CEO Message

Mr Emilio van Doorn
Founding Director

Good may be good enough for some organisations, but most of us want more than that. Something inside us wants to create a better legacy. We want to build accomplishments that will be, even years later, remembered. At 99 Risks, our passion and mission is to enable distinction in people and organisations everywhere. To that end, the 'greatness' is not measured by operational performance or financial outcomes alone, but by Sustainability, Resilience, Engagement, and Contribution.

We have been privileged to work with a multitude of organisations striving to achieve significance. We have gone deep inside their operations, examined their inner workings, and analysed data from countless project teams.

The outcome was a far-reaching understanding of what constitutes a high performing enterprise, what challenges typically obstruct progression, what conditions are ideal for success, and what leadership's role is in the process.

Speaking for the future, there naturally remains much uncertainty in our global community. However, the past has shown us that success can come if we remain bold, continue to take brave decisions, and go forward with confidence in our vision and purpose.

In closing, I want to thank every organisation which has partnered with us. Our combined strength is what makes us successful as a company.
